Ahmed Medhat Abu Ghida

+971503900168 |a_aboghida@yahoo.com **| LinkedIn | Abu Dhabi, UAE**

Career Summary:

Accomplished Senior Consultant and Lead Instructor with over 13 years of leadership experience driving cross-functional teams in AI, Machine Learning, Data Science, and Business Process Optimization. Adept at steering enterprise-wide initiatives that deliver transformative, data-driven solutions through advanced modeling, strategic advisory, and scalable AI implementations. Proven track record of leading critical projects in CX economics, customer churn prediction, and GenAI at Dell Technologies, while also mentoring and developing future data professionals via hands-on instruction and curriculum design at premier training institutes. Committed to leveraging deep technical knowledge and strategic consulting skills to spearhead innovation, accelerate digital transformation, and generate measurable business impact within dynamic organizations. Expertise includes applying quantitative business analysis, forecasting (ARIMA, Holt-Winters), and operations research methodologies (linear/integer programming, queuing theory) to solve complex challenges and optimize operational performance. Proficient in predictive modeling, simulation (system dynamics & discrete event), and advanced Excel modeling with Solver and VBA, alongside strong technical command of Python, R, SQL, Apache Spark, and TensorFlow for end-to-end data science and AI solution delivery.

Core Competencies:

- Artificial Intelligence (AI)
- Machine Learning (ML)
- Strategic AI Implementation
- Project Lifecycle Management
- Data-Driven Decision Making
- MLOps Leadership
- Stakeholder Communication
- Performance Coaching & Team Development
- Cross-Functional Team Leadership
- Data Science
- Deep Learning
- Predictive Modeling
- Natural Language Processing (NLP)
- Big Data Analytics
- Customer Churn Prediction
- Operations Research
- CX Economics Modeling
- Retrieval-Augmented Generation (RAG)
- Python Programming
- SQL (Structured Query Language)
- Tableau Data Visualization
- Apache Spark / PySpark
- TensorFlow / Keras / PyTorch
- Statistical Analysis
- Business Intelligence (BI)
- Forecasting & Time Series (ARIMA, Holt-Winters)
- Optimization Modeling (Linear Programming, Simplex)
- Data-Driven Decision Making
- End-to-End Model Deployment
- Cloud Platforms (Microsoft Azure, Google Colab)

Work Experience:

Data and AI Senior Consultant **June 2021 till Present**

Dell Technologies

Achievements:

- **Led a CX Economics Modeling initiative that quantified the financial impact of Net Promoter Score (NPS) changes on company revenue, enabling executive leadership to prioritize customer experience investments based on projected ROI.**
- **Developed and deployed a customer churn prediction model, collaborated with the marketing team for root cause analysis, and implemented proactive retention strategies—resulting in a measurable reduction in churn rate and improved customer lifetime value.**
- **Designed and delivered an Agentic RAG (Retrieval-Augmented Generation) system that enabled top management to generate concise, multi-source account summaries on demand—streamlining executive decision-making by integrating data from cross-functional departments and databases.**

Value Added:

- Direct and coordinate a cross-functional team of five specialists, including data scientist, data analyst, machine learning engineer, data engineer, and AI engineer, to deliver high-impact analytical solutions, drive AI innovation, and support data-driven decision-making across the organization.
- Architect and deliver cutting-edge AI and machine learning solutions to address complex business problems, utilizing robust data infrastructures and integrating seamlessly within enterprise ecosystems.
- Partner with organizational leaders to evaluate data maturity levels, define actionable AI strategies, and develop tailored solutions that drive innovation, efficiency, and digital transformation.
- Oversee the design and implementation of scalable data pipelines, predictive analytics models, and machine learning workflows using Python, Spark, TensorFlow, and leading cloud technologies to support real-time insights and strategic decision-making.
- Manage the full lifecycle of AI/ML initiatives, from data discovery and model development to deployment, performance tracking, and continuous optimization in production environments.
- Advise executive stakeholders and cross-functional teams on AI ethics, model transparency, data governance, and responsible AI adoption to ensure trustworthy and impactful outcomes.

Data Science Consultant **Sep 2016 – May 2021**
Alexander Proudfoot Management Consulting
Value Added:

- Analyze and interpret complex datasets to identify performance improvement opportunities and support strategic decision-making for client organizations across various industries.
- Develop predictive models and data-driven solutions to enhance operational efficiency, reduce costs, and increase productivity in client business processes.
- Collaborate with cross-functional teams, including consultants and client stakeholders, to translate business challenges into analytical frameworks and actionable insights.
- Present findings and recommendations through clear visualizations and executive reports to guide clients in implementing sustainable improvements and achieving measurable results.

Lead Instructor / Senior Trainer (AI Engineering - Data Science & AI - Big Data - Machine Learning - Big Data Analytics)
May 2021 – till Present
Mystro
Informa Academy
SimpliLearn
Coding Dojo
Kaplan
Value Added:

- Lead curriculum development and instructional delivery for advanced courses in AI Engineering, Big Data, and Machine Learning, ensuring content aligns with current industry standards and technological advancements.
- Train and mentor aspiring data scientists and AI engineers, guiding them through complex topics such as neural networks, distributed computing, and real-time analytics using platforms like Hadoop, Spark, and TensorFlow.
- Supervise a team of junior instructors and teaching assistants, providing support, feedback, and quality control to maintain high teaching standards across all learning programs.
- Design and oversee hands-on projects and industry simulations, enabling learners to apply AI and big data solutions to real-world business problems.

Instructor (Data Science & Machine Learning - Data Analytics - Excel, SQL, Tableau, Python - Deep Learning)
Oct 2020 – till Present
Epsilon Training Institute.
General Assembly
Value Added:

- Design and deliver comprehensive training programs in Data Science, Machine Learning, Data Analytics, and related tools (Excel, SQL, Tableau, Python), catering to students with diverse backgrounds and skill levels.
- Develop hands-on projects and real-world case studies to reinforce key concepts in deep learning, predictive modeling, and data visualization, ensuring practical application of theoretical knowledge.

- Provide one-on-one mentorship and technical guidance, supporting students through capstone projects, coding challenges, and career transitions into data-focused roles.

Consultant / Advisor / Instructor (Lean Six Sigma – TQM - Business Process Management - Supply Chain, Operations Management & Change Management) **Jan 2010 – Oct 2016**
American University in Cairo (AUC)
Efeso Management Consulting
Davaci Management Consulting

Pharmacist **Oct 2007 – Aug 2010**

Education

- **Master of Science in Operations Research, Statistics & Mathematics from the Department of Management Science, School of Business |** The University of Strathclyde, UK
- **Bachelor of Pharmaceutical Sciences |** Mansoura University | 2005

Courses & Certificates

- **Complete Generative AI Course with Langchain and Huggingface.**
- **LLM Fine Tuning Fundamentals + Fine tune OpenAI GPT model.**
- **Azure AI Studio - Complete Guide to Azure AI Studio Copilot.**
- **LLM Engineering: Master AI & Large Language Models (LLMs).**
- **Machine Learning by Stanford University** | Coursera.
- **Python for Data Science and Machine Learning Bootcamp |** Udemy**.**
- **Natural Language Processing with Python.**
- **Machine Learning A-ZTM: Hands-On Python & R in Data Science** | Udemy**.**
- **Complete Tensorflow 2 and Keras Deep Learning Bootcamp |** Udemy.
- **Deployment of Machine Learning Models |** Udemy.
- **Data Science & Analytics |** IBM**.**
- **Complete MLOPs Bootcamp |** Udemy.
- **Big Data with Apache Spark and Python.**
- **Machine Learning, Data Science and Generative AI with Python from Udemy.**
- **Deep Learning Specialization by deeplearning.ai on Coursera.**
- **Complete Data Science, Machine Learning, DL, NLP Bootcamp.**
- **Data Analyst Nano Degree from Udacity.**

Notable Projects

- **Regression models to predict cNPS for different programs such as: CSB, CSG & ISG.**
- **Classification models to predict whether the customer will be 'Promoter', 'Passive' or 'Detractor' for different programs.**
- **Driver analysis via interpretation models to understand which factors affect our customers and communicate the results to non-technical stakeholders.**
- **CX economics model to quantify how much money we lose when cNPS goes down & how much money we gain we cNPS goes up.**
- **Regression model to study Dell competitors and understand how our products rank in comparison with the other manufacturers.**
- **NLP modelling to analyze the verbatim in different surveys.**
- **Modelling the customer journey via classification model to understand how our operational KPIs affect customers and predict customer status.**

Languages

- **Arabic: Native**
- **English: Advanced**
